

FULL SERVICE PACKAGE

Cementing, perforating and acidizing in Glass Reinforced Epoxy (GRE) cased wells

GT Blend

- ✓ Innovative system specially customized for cementing GRE casings
- ✓ Well-established low-weight system for casing collapse control
- ✓ Premium cement bonding on GRE and steel tubular
- ✓ Field and lab verified cement adhesion

Equipment for cementing and perforating GRE

Lab testing with acid systems

Perforating GRE with acid-soluble abrasive material

60 kg/m³ of solids pre-mixed in gelled water. Pumping rate of 500 L/min resulted into 180 bar

Excellent results from yard tests

Jetting tool with 8 nozzles (2.5 mm ID) distributed in 2 levels

Open hole: 9 3/8" GRE centralized in 13 3/8" casing

Cased hole: 7" GRE cemented in 9 3/8" casing

Benefits

- ✓ Full service package with competent and reliable partner
- ✓ FES is recognized and appreciated for its excellence in customized solutions, creativity and flexibility
- ✓ Skilled team and state-of-the-art technology as your key to successful projects
