## STIMULATION

### Highest efficiency and safety standards

We focus on offering an attractive service portfolio while meeting safety and quality standards with added value to our customers. In this context, we always prefer products with the lowest possible environmental impact. Our main drive is providing an excellent fluid composition based upon individual well conditions and close cooperation with the client.

## CEMENTING

### Customized solutions: ready for any challenge

As operating conditions vary fundamentally for each well, we continuously advance and optimize existing procedures while simultaneously focusing on the environmental impact of our products.

## DOWNHOLE TOOLS

### The right tool for the job

Our Downhole Tool Department offers you a variety of service and production packers as well as retrievable bridge plugs, drillable bridge plugs and cement retainers in all common sizes. The required engineering is covered by our own software program. Our specialists are also available for inspection and maintenance of your downhole tools as an optional service.

## INDUSTRIAL SERVICE

### Mobile and efficient: we transport your energy

Fangmann Energy Services has been supplying compressor services with state-of-the-art mobile units for more than 30 years. We are most experienced in transporting and compressing natural gas, which is an important component of the next generation energy supply.

## LAB SERVICE

### Innovative technology

The FES laboratory uses approved and advanced equipment to ensure the highest QA/QC standards. We also meet specific client requests and perform all the mandatory tests to comply with API/ISO specifications. To keep pace with increasingly high requirements for fluid recipes, we at the FES laboratories offer a customized and innovative approach in our system development.

## CERTIFICATIONS & QUALIFICATION

# Tested quality – certified safety

The long-term business success of Fangmann Energy Services depends on our ability to continually improve the safety and quality of our products and services while protecting people and the environment.
